

2018 DHS P4P Measures – SSI

Total of 9 measures (7 HEDIS, 2 HEDIS-like)

The State of Wisconsin's Pay for Performance (P-4-P) initiative is a program based on the state withholding a predetermined percentage of the capitation payments made to each HMO; this withhold can be earned back based on performance relative to quality goals below. These capitation payments from the state are one of the main revenue streams iCare receives to run our business.

The measures below represent the targets for the 2018 SSI P4P program to achieve to get a high, medium, or low rating.

Measure	High	Medium	Low
ED Visits (AMB) * <i>[Reverse measure - Lower score is better]</i> – Number of ED visits during the measurement year that do not result in an inpatient stay, regardless of the intensity or duration of the visit. <ul style="list-style-type: none"> • ED Visits per 1000 MbrMnths (not %) • The measure does not include mental health or chemical dependency services. 	<=108.3	108.4-119.7	>=119.8
Antidepressant Medication Management- Continuation (AMM) – Percentage of members 18 years of age and older who were diagnosed with a new episode of major depression and treated with antidepressant medication, and who remained on an antidepressant medication for at least 180 days (6 months).	>=41.1%	39.3%–41%	<=39.2%
Breast Cancer Screening (BCS) – Percentage of women MA enrollees 50 to 74 years of age (denominator) who had a mammogram to screen for breast cancer (numerator).	>=65.5%	63%-65.4%	<=62.9%
Comprehensive Diabetes Care - HbA1c Testing – Percent of diabetic members whose most recent HbA1c test during the measurement year is ≤9.0%.	>=90.1%	88.9%-90%	<=88.8%
Comprehensive Diabetes Care - HbA1c Control < 8 – Percent of diabetic members whose most recent HbA1c test during the measurement year is ≤8.0%.	>=53.7%	48.9%-53.6%	<=48.8%
Controlling BP (CBP) – Percentage of members 18–85 years of age who had a diagnosis of hypertension (HTN) (denominator) and whose BP was adequately controlled (<140/90) for members 18-59 years of age and 60-85 years of age with diagnosis of diabetes or (150/90) for members 60-85 without a diagnosis of diabetes during the measurement year (numerator).	>=63.1%	56.9%-63%	<=56.8%
Follow-Up After Mental Health Hospitalization - 30 Days (FUH 30) – Percentage of discharges for members who were hospitalized for treatment of selected mental health disorders and who had an outpatient visit, an intensive outpatient encounter or partial hospitalization with a mental health practitioner. <ul style="list-style-type: none"> • 30-Day Follow-Up = An outpatient visit, intensive outpatient encounter or partial hospitalization with a mental health practitioner within 30 days after discharge. • Includes outpatient visits, intensive outpatient encounters, or partial hospitalizations that occur on the date of discharge. 	>=72%	65.4-71.9%	<=65.3%

<p>Initiation and Engagement of AODA Treatment – Engagement (IET) – Members with a new episode of alcohol or other drug dependence (AODA) between January 1 and November 15 (Intake period) who had one of the following: An outpatient, intensive outpatient, or partial hospitalization visit with a diagnosis of AOD / A detoxification visit / An ED visit / An inpatient discharge with a diagnosis of AOD/ A negative diagnosis history (AOD within 60 days)</p> <ul style="list-style-type: none"> • Initiation Phase: Members who initiate treatment through an inpatient AOD (Alcohol or other drug dependence) admission, outpatient visit, intensive outpatient encounter, or partial hospitalization within 14 days of the diagnosis. • Engagement Phase: Members who initiate treatment and have two or more additional services with a diagnosis of AOD within 30 days of the initiation visit. <p>Note: <i>When the Initiation of AOD treatment and the initial date of service during the intake period (January 1 – November 15) occur on the same day, they must be with different providers.</i></p>	>= 14.7%	9.6%- 14.6%	<= 9.5%
<p>Tobacco Cessation Counseling – Percentage of members 19 years of age or older who were identified as tobacco users and who received tobacco cessation counseling during the measurement year.</p> <p>The member is compliant if he or she received counseling to quit smoking either face-to-face or by phone as identified by a claim or encounter code.</p> <ul style="list-style-type: none"> • Striving to Quit- Members that received tobacco cessation treatment through the Quit Line or First Breath count in the measure. 	>= 70.4%	65.5%- 70.3%	<= 65.4%

2018 SSI P4R Measures

The State of Wisconsin's Pay for Recording (P-4-R) initiative is a program used by the state to introduce measures that will likely become P4P measures in the coming year or two.

To complete these measures, we just need to provide proof that they were performed during the measurement period.

CATEGORY	MEASURES TO BE RECORDED
Preventive & Screening Measures	<ul style="list-style-type: none"> • Adult BMI (ABA) - Percentage of MA enrollees 18-74 years of age (denominator) who had an outpatient visit and whose body mass index (BMI) was documented during the measurement year or the year prior the measurement year (numerator). • Adult access to preventive care (AAP) - Percentage of members 20 years and older who had an ambulatory or preventive care visit. 20 years and older as of Dec 31. No more than one gap in enrollment of up to 45 days. <i>[Administrative measure]</i>
Mental Health / Substance Abuse Measure	<ul style="list-style-type: none"> • Mental health utilization (MPT) – All members receiving the following mental health services during the measurement year: <ul style="list-style-type: none"> - Inpatient. - Intensive outpatient or partial hospitalization. - Outpatient. - ED. - Telehealth. - Any service.
